DJ LIBRARIAN

3 MOVES THEN COFFEE

Your first session. rekordbox stays untouched — it reads a copy.

1 SAY HI

Open a Cowork task. Type **hi**. It asks **Mac or Windows** and what they call you in the booth. Tap, type, done.

under 1 min

2 EXPORT

In rekordbox: **File → Export Collection in xml format**. Name it **collection.xml**, save to Desktop. Say **done**.

2 min

3 FOLDER

In Cowork: **Add folder →** a new one called **dj-library**. Drop **collection.xml** in it. That folder is yours: plain text, keep it.

1 min

4 COFFEE

It reads the export, measures the library, learns your lanes. No questions. A task list ticks along. rekordbox untouched.

~5 min

5 THE REPORT

Opens on the side. **Your sleeve** and archetype. How the library is built. **3 ways to rebuild it**, each with the words to say.

5 min to read

6 PICK ONE

Say **"Build me the ___ structure"**. You see the tree first. Say **yes →** you get an XML. **You** import it in rekordbox. Until then, nothing changed.

2 min + import

SAY THESE

It only proposes. You decide. Your call, always.

Build me the House Bases structure	The tree, as an XML to import. Nothing moves until you import.
Crate me 50 for Saturday	30 / 50 / 70 tracks from **your own** library for a night or a vibe, with spares.
Style barber	Ten minutes of A/B picks. Sharpens your taste file so crates get better.
Show my report	The sleeve, the numbers, the three ways. After a new export it re-reads first.
Set me up	Code tab → **/dj-librarian:install** → Allow. Then say set me up.

IMPORT THE XML (REKORDBOX)

Preferences → **Advanced** → **Database** → **rekordbox xml**: pick the file in **dj-library/proposals/**. In the left tree open **rekordbox xml**, right-click a playlist → **Import Playlist**.

THE RULES IT LIVES BY

Adds only. Never deletes, renames or reorders. Every write: a preview, then it asks. Every number comes from the tool. Taste is yours.
